

# PROCUT

## Disposable Automatic Biopsy System

PROCUT is a disposable automatic system for taking a range of tissue specimens, including those from prostate, kidneys, breast and liver.

Designed to the highest specification, PROCUT allows samples to be taken by performing a simple single-handed operation using either the front or rear trigger for firing.

PROCUT can be supplied with coaxial needle for multiple biopsies.

### Features:

- Specimen notch 20 mm
- Colour coded firing triggers to identify size
- Centimetre depth marking with echogenic tip
- Choice of two firing triggers
- Two stage arming to reduce effort
- High speed firing
- Flat base for easy connection to U/S probe

PROCUT	Description (gaxcm)	Unit per box
PAG 1410	14 x 10	10
PAG 1416	14 x 16	10
PAG 1420	14 x 20	10
PAG 1610	16 x 10	10
PAG 1616	16 x 16	10
PAG 1620	16 x 20	10
PAG 1810	18 x 10	10
PAG 1816	18 x 16	10
PAG 1820	18 x 20	10
PAG 1825	18 x 25	10
PAG 2010	20 x 10	10
PAG 2016	20 x 16	10
PAG 2020	20 x 20	10

On request, it is possible to produce needles with different sizes.
